

Autorola Solutions supporting Service and Logistics Providers all over the world

Efficient logistics is at the core of your value proposition to customers. Achieving this requires seamless tracking of customer volumes, service providers, and various locations. Autorola Fleet Monitor offers a digital platform to your logistics operations, providing the information you need to succeed.

Our digital solutions streamline critical processes by creating automated workflows that integrate customers, partners, and service providers. Seamlessly connected with other systems, our platform supports all your workflows and processes, from optimizing your supply chains to improving order and delivery processes.

Benefits of using the Fleet Monitor

With Fleet Monitor, you can visualize information in real time and customize it across various organizational levels. Moreover, you can communicate effortlessly with connected partners such as appraisers or document service providers within your digital ecosystem.

Optimal process management and reduced lead times are at the core of Fleet Monitor, enabling you to track customers' volumes, service providers, and locations. By utilizing Fleet Monitor, you establish a digital connection to your physical logistics and service processes, providing all the information you need for your business.

In short, Fleet Monitor from Autorola offers you a powerful tool for optimizing processes and transparency, while delivering tangible benefits to the organization. Our services provide full flexibility in one centralized platform. Complete transparency throughout our systems gives you control of the entire value chain, while customizable workflows allow you to delegate tasks and collaborate effectively with partners and suppliers.

By using our platform,

you can enjoy a resource-efficient and hassle-free experience while maintaining complete oversight of your management operations, with benefits such as:

Real-Time Insights and Control

With a centralized platform, Fleet Monitor visualizes customer information in real time, allowing you to make informed decisions. Collaborate with connected partners such as appraisers and document service providers seamlessly. Compare and control different processes across locations to optimize operations and create transparency.

Customized Integration and Workflows

Integrate key partners into your workflows for streamlined, secure processing. Configure partner access individually to manage assigned tasks effectively. This structured approach allows you to manage your value chain with ease, constantly refining workflows in the entire value chain.

Flexible Modules

The platform supports full-service operations for a range of fleet owners, accommodating unique requirements with customizable solutions and allows you to manage services efficiently and ensure accurate invoicing.

Order Management and Tracking

The platform facilitates structured collaboration with suppliers, enabling efficient order processing and real-time communication. Measure and optimize lead times and workflows with third-party suppliers.

Advanced Booking Capabilities

The Booking Module simplifies resource allocation and scheduling, ensuring smooth operations for fleet owners and compound providers. Manage bookings and availability with a real-time calendar view for optimal efficiency.

Enhanced Collaboration and Communication

The live chat feature, Fleet Chat, transforms collaboration by providing a direct communication channel on individual vehicles. All messages are visible, enabling instant problem-solving and relevant, real-time discussions.

Maximize Efficiency and Control

Autorola Fleet Monitor streamlines every aspect of your logistics operations, keeping your fleet running smoothly and efficiently. Experience the benefits of structured workflows, customized integration, and advanced features designed to elevate your business to new heights.

Resource efficiency

Free up your time and resources with automated processes and streamlined workflows.

Maximize Profitability

Make data-driven decisions to optimize your fleet's performance and profitability.

Hassle-Free Management

Stay in control of your fleet with user-friendly tools and comprehensive monitoring.
